IMMERSION HEATER

HEATING ELEMENTS

TOP ENTRY IMMERSION HEATER GN

Top entry immersion heaters are used for heating and boiling water. These cheap, safe and easy to use heating units have been very popular with customers for years. Depending on their size and wattage, they can be used for heating various amounts of water, from as much as a glass to a container the size of a bucket. They are indispensable when travelling, on a camping or in a sanatorium.
