

U-TYPE TUBULAR IMMERSION HEATER;
THERMOSTAT INSTALLATION POSSIBLE
FOR BOILERS, GAS AND ELECTRIC WATER HEATERS

GRB

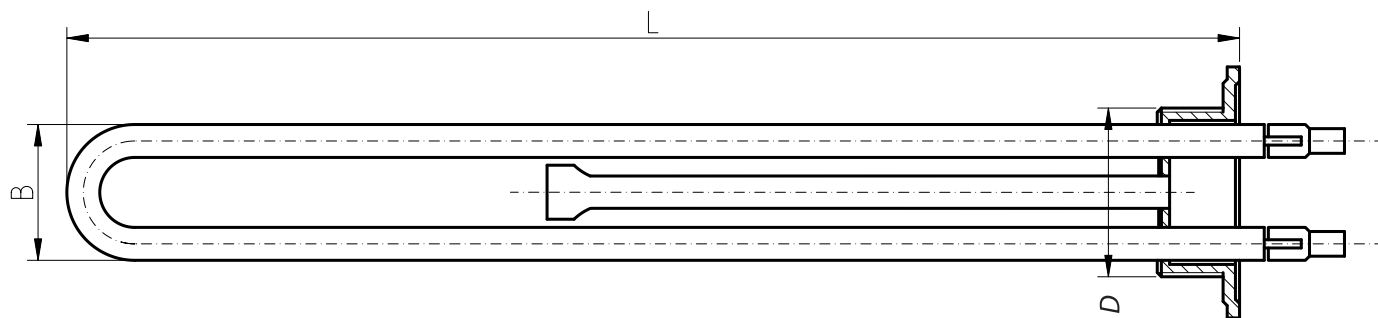

- wide range of use
- easy and convenient installation
- fastening: 5/4" flange
- according to EU standards

TUBULAR IMMERSION HEATER

HEATING ELEMENTS

U-TYPE TUBULAR IMMERSION HEATER; THERMOSTAT INSTALLATION POSSIBLE FOR BOILERS, GAS AND ELECTRIC WATER HEATERS **GRB**

No.	L	B	D
1	340	40	5/4"
2	410	40	5/4"

GRB heating elements are popular and economical heaters for a wide range of domestic appliances.

A special flange with thermostat capillary tube output enables future installation of thermostat. They are perfect for boilers and water heaters, both capacity and pressurized ones. Technology used for the production provides the highest and most economical operation of the device.

Copper pipe applied – do not use for stainless steel water tanks.
