TUBULAR IMMERSION HEATER

HEATING ELEMENTS

TUBULAR IMMERSION HEATER FOR OIL HEATERS AND WASHING MACHINES **GRO, GRA**

GRA heating elements are products of ELIKO intended for automatic and impeller washing machines. High quality of the product translates into effectiveness and reliability of the heater. GRA heaters are very often used by domestic appliances service centers in Poland and have a very good opinion among customers. GRO heater is a product meant for oil heaters. Both, the construction of the heater and materials used for the production guarantee their long and reliable work in heaters which use oil as a heating power.
