**HEATING ELEMENTS  
WITH THERMOSTAT**

# IMMERSION HEATER WITH THERMOSTAT FOR CAPACITY WATER TANKS **GRBT HIGH TSE**

No.	L	A	D
1	335	35	5/4"
2	390	36	5/4"
3	335	35	6/4"
4	390	36	6/4"

GRBT high TSE heating elements are the most popular products for small and medium-sized water heaters.

Higher flange definitely makes the installation of the unit in the water tank much easier.

COTHERM thermostat with double pole safety limiter, which is the basic EU requirement, ensures the reliability of the product. The heater can be used in most water tanks available in the Polish market.

Copper pipe applied – do not use for stainless steel water tanks.
